## School Opening Concerns

---

Don't forget, with the summer vacation drawing to a close, school's will soon be opening. If you are working on a construction or renovation project at a school or college, your site may require special service to accommodate the returning students. Dumpsters may need to be relocated, extra waste may need to be removed or pick-up times may need to be re-scheduled. Please contact Diamond Waste today with any questions or concerns - we are always ready to help.

## Save Money On Demolition Waste Removal

---

Diamond Waste Services, Inc. offers a demolition waste recycling program that can save your project money through reduced tipping fees, improved rates of recycling and higher quality recyclables. It's no secret that recycling can save your project money. Concrete and masonry aggregates, bricks, steel and other materials all have established markets for recycling that can be used to offset your demolition costs.

But there is a subtle art to maximizing those savings - choosing the right recycle methods that match job site conditions; specialty waste removal of creosote lumber, tires, etc.; practical logistical considerations and providing reliable service with excellent communication. In short: caring about it. This is where Diamond Waste excels - where our service shines! We have a proven track record in LEED compliant waste removal, and that experience can be put to work for you. Whether LEED compliance is to goal or not, recycling can save you money.

Not all recycling programs are created equally, call Diamond Waste today and find out how we can make a difference on your next demo job.

## Demolition Waste Removal Solutions

---

Diamond Waste Services, Inc. is a Maryland company based near BWI airport, providing roll-off waste containers and waste removal solutions for construction, demolition and industrial applications.

- 15, 20 and 30 yard containers for large construction & demolition projects
