Anne Arundel County Public School Board Recognizes Diamond Waste Donations

Diamond Waste was recently honored by the Anne Arundel County Public School Board for the donation of recycled wood to the county's Center of Applied Technology Campuses. Diamond was able to haul clean wood and building materials from area demolition sites to the school system, keeping the materials out of the landfill and providing resources for area students.

Here is what the School Board had to say:

"Members of the Board and Dr. Maxwell, we are very proud of today's honoree because its contribution to our schools is the kind of community partnership we are seeking - and we certainly hope other companies will follow the example that has been set.

Diamond Waste Services, Inc. has contributed building materials that have been utilized in the Building Construction Program to support the development of student skills in residential wall framing and roof construction at our Center of Applied Technology Campuses.

In an economic recession, schools feel the pinch to do 'more with less money,' so valuable community partners are even more essential during lean times. We don't want to underestimate how much of a sacrifice it is for companies to contribute or to continue to contribute like this during these difficult times.

Diamond Waste's donation of wood was used by CAT South to teach lessons on safe handling of lumber, techniques to disassemble wood, pulling nails properly, better use of hand tools, stacking and storing of lumber and learning about different brackets and hangers. At CAT North, the materials were used to prepare student competitors for the State Skills USA Carpentry and Teamwork Competition. In addition to our Centers of Applied Technology campuses, various truckloads of recycled lumber also went to some of our middle and high schools to be used in the Tech. Ed. classes.

A partnership has been formed and Diamond Waste plans to continue working with our schools to supply other materials as they become available."

Now Available! - Computer Tracking of Recycling Across Multiple Job Sites

Are you responsible for LEED compliant recycling and waste removal at several job sites? Are you looking for a way to better monitor those projects and streamline your work day?

If managing effective waste removal and recycling across your organization is of concern, Diamond Waste has the solution: Organizational Recycling Summary Reports. We've offered computerized tracking and documentation of recycling for LEED MR Credit 2.1 and 2.2 certification since 2006. Now that same detailed reporting is available to Diamond Waste customers with multiple job sites. A single, concise summary allows you to track each individual sites progress at a glance. You can see which materials are being recycled, the amounts thereof and where they were hauled.

It's just one of the ways we seek to make your job easier. And it's a benefit only available from Diamond Waste.

Portable Toilets Now Available!

Diamond Waste Services, Inc. is pleased to announce the creation of Diamond Environmental Services, LLC (DES), a sister business now operating out of our Glen Burnie location.

DES offers portable restroom rentals for construction sites, special events, weddings and sporting events in the Baltimore-Washington-Northern Virginia area. DES also offers residential septic and marine bilge tank cleaning services.

For service arrangements and information, please contact Tom Thur at 443-749-1009; tthur@desprivy.com.
